

Language is what makes us human it is a recourse against the meaningless noise and silence of nature and history (Octavia Paz Baby I okay this lady behind the 100 you running Sign language as a system where we use where there is communication it's something it's something unique where are we coming which is used for communication something to do with communication okay someone two more people want to add something that you didn't mention yes thank you for repeating communication on some things fresh that has something that is not in communication and system So what about me picture because there are two things you have language and literature okay which is the difference I'm not going to ask you but I will show you in the next night next month go back to work Weather tomorrow Rodrigue and smoking something this in these subjects you're not only going to be focusing on written but also spoken next line so now if you have to differentiate that the device language and literature you can look at the elements and most of you from your primary school you've been focusing more on this side talking about Grandma vocabulary syntax syntax is just the way you organize the ones to make a sentence okay diction is all about the choice of one figurative language relative language I know most of you have not covered that and then register so register is language depending on different communities and then on the other side you have literature and the elements are blocked character setting theme conflict point of view tone can literary devices okay so most of the things on the other side will be new to you or even if they're not new it will be an opportunity for you to go deep and understand the much better next slide so I skipped a lot of things because I know that they're being repeated things to do with Ivana profile things to do with 8 years skills because I know that being repeated throughout the whole station and ordered to jump straight to our objectives and we have for objectives and for each objective there is a strand so what objectives there is analyzing meaning Yeah speech then I'll be looking at producing text which means you'll be looking at how to write how to speak and how do you do that in the right way the release can you look at using language and using language Israel now we look at things to do with the drama and receive that all that okay next line because in literature we have to look at different genres so this year you're going to cover only for genres in four units if that's the genre which you're going to start with this biography and that is our password About the end of your first unit what are some of the skills you expect you to develop one really critically and analytical critical the means you're reading quantitative not criticizing you're pretty taking whatever you are reading which means you are thinking before you've been reading when you've been reading Was this person trying to say what mindset was it in where was he why did he write what he wrote could he have written something different if he was in a different situation so all that is okay speaking and presenting confidently listening and responding researching on organization okay so white matters I'll send you all that and you'll see why it matters but the last thing that I want us to look at is what is expected of you next month so you must come and prepare you must engage activity you must respect others thank you be creative use give credit to the sauce okay no using AI reflect and improve always have work to improve looks like so as lions okay it says here the language and literature is not just about starting text but about exploring Who You Are how you feel and now you connect with the one okay so you think that will make you better life thank you.
